### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

While individual features of the nozzle were found, the structures were not found in combination or rendered obvious by the prior art. Specifically, in combination with the other claim 1 limitations, an outer surrounding surface having a plurality of elongated grooves formed therein which are angularly displaced from one another about the axis, each of said grooves extending in a longitudinal direction substantially parallel to the axis, and having proximate and distal ends proximate to the outlet and the inlet, respectively; and; a flow diverting member defining a passage therein, said passage having two regions which are opposite to each other in a radial direction relative to the axis and which are fluidly communicated with said outlet of said channel and said proximate ends of said elongated grooves so as to enable the fluid in said channel to be diverted to flow from said proximate ends towards said distal ends along said elongated grooves in a plurality of fluid streams; and an outer surrounding surface of said tubular body having a plurality of ejecting holes which are formed adjacent to said distal ends of said elongated grooves was not found or fairly taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3754
